

USAMA DANISH

Senior Frontend Engineer — React · Next.js · TypeScript

Berlin, Germany · usamadanish22@gmail.com · linkedin.com/in/usama-danish

Based in Berlin · EU Blue Card eligible upon offer — no sponsorship costs, no relocation delay (Chancenkarte) · Available immediately

PROFILE

Senior Frontend Engineer with 8+ years of experience leading the development of user-facing features in high-performance, scalable web applications. Hands-on React, Next.js and TypeScript delivery from conception to execution, with clean, well-tested code, frontend architecture ownership, and a track record of mentoring junior developers.

- **Scale:** real-time interfaces rendering 11,000+ data-heavy items with SSE-driven live updates and sustained performance.
- **Architecture:** micro-frontends (Module Federation), a bank-wide design system, shared libraries and monorepo tooling adopted across product teams.
- **Leadership:** mentoring junior developers, code reviews, technical interviews, and sprint planning; primary reviewer for production-critical code.
- **Impact:** led a business-critical launch generating **\$500K+ within two weeks**; built GDPR-compliant products end-to-end for Swedish clients.

CORE TECHNICAL SKILLS

Frontend (primary): React, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Hooks, HTML5, CSS3, Tailwind CSS, Design Systems, Micro-Frontends (Module Federation), GraphQL

Backend: Node.js, NestJS, RESTful APIs & async request handling, MongoDB, serverless

Real-time & data: Server-Sent Events (SSE), Chart.js, D3, high-frequency UI updates

Quality & testing: Jest, React Testing Library, Playwright (E2E automation), TDD, SonarQube, accessibility (a11y), code reviews

DevOps & cloud: Jenkins CI/CD, Nexus, Git, AWS (EC2, S3, Lambda, CloudFront), GCP, Nginx

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer · Emirates NBD

Oct 2023 – Present

Leading bank in the UAE · Dubai — working remotely from Berlin — digital wealth management & trading ecosystem

ENBD Wealth Pro — *greenfield B2B platform for professional advisors (React, TypeScript, Next.js)*

- Drove the platform from ideation to go-live, POCs, architecture decisions and stakeholder alignment, delivering a data-intensive B2B product managing high-value client workflows.
- Built the frontend architecture: reusable component design system, Redux Toolkit store with clean separation of concerns, standardized API layer with interceptors and centralized error handling.
- Implemented SSE-based real-time data streaming and comparison views; production monitoring with Adobe Analytics.

ENBD X & Emirates Islamic — *consumer platform serving the bank's retail customer base (Angular, RxJS)*

- Delivered complex customer journeys covering **11,000+ items**, including data-heavy dashboards, holdings management and portfolio views.
- Broke a monolith into micro-frontends, enabling independent deployments per team, built a bank-wide design system with multilingual Arabic/English (RTL) components.
- Introduced Playwright E2E automation and quality gates (Jenkins, SonarQube, Nexus), accelerating release cycles.

- Led a feature launch generating **\$500K+ in revenue within two weeks** of release, working cross-functionally with product, backend and compliance.

Technical Leadership — across both platforms

- Mentored and onboarded 8 engineers, including junior developers, primary reviewer for production-critical pull requests, and defining frontend coding standards.
- Conducted technical interviews for frontend hires, led sprint planning and backlog refinement with product.

Software Engineer · NeoPal Software Solutions

Feb 2023 – Sep 2023

Software agency · Lahore, Pakistan — real-time communication and social products

- Built high-availability backend services (NestJS, MongoDB) for a real-time multilingual communication platform, targeting sub-200ms API response times for an instant user experience.
- Optimized MongoDB data modelling and indexing for fast reads, implemented social sign-in (Apple, Google, Facebook, Twitter) and Twilio messaging integration.
- Deployed on serverless AWS (Lambda, S3) with CI/CD pipelines.

Software Engineer (Full Stack) · DPL (Pvt.) Ltd.

Feb 2021 – Feb 2023

Software company · Islamabad, Pakistan — product delivery for Swedish (EU) and international clients

- **Pluck GG (Sweden), esports PaaS** — rebuilt a monolith into headless microservices (Node.js, NestJS, MongoDB) powering esports-academy and player-scouting products connecting thousands of teams to 100+ data sources.
- Built data-access layers and scheduled analytics pipelines aggregating player metrics (playtime, kills, survival, movement), exposed APIs feeding live leaderboards, scoring and rankings.
- Delivered white-label solutions for international esports organisations (e.g. Team Singularity).
- **Miracle Morning, global wellness platform** — built Node.js backend services for diary management, streak rules and habit tracking for a large international user base, MailChimp integration and AWS deployments.

MERN Stack Developer · SecureHops IT Consultancy

Nov 2019 – Jan 2021

IT consultancy · Lahore, Pakistan — sole engineer for three Swedish (EU-market) client products, end-to-end — GDPR-compliant delivery

- **Tilly (Sweden), fertility & mental-health app** — owned the product end-to-end from ideation with product and design to production. React/Next.js frontend, NestJS/MongoDB backend, admin panel for surveys and clinic management, GDPR-compliant handling of sensitive health data, AWS deployments with release and rollback plans.
- **BrightBee (Sweden), consumer marketplace** — built full stack with Facebook Graph API integration and Stripe payments (React, Node.js, MongoDB, AWS).
- **BeautyQlick (Sweden), beauty-tech platform** — took over a failing codebase, rewrote the APIs, restructured the database, and built price/deal aggregation across multiple Swedish beauty retailers (Angular, Node.js), ran client meetings and onboarded new developers.

Associate Software Developer · Digicare IT Consultancy

Feb 2018 – Aug 2019

IT consultancy · Gujranwala, Pakistan

- Developed and maintained e-commerce web applications (ASP.NET Core, MVC) alongside senior developers.

EDUCATION

BS (Hons) Information Technology · University of the Punjab, Pakistan

2014 – 2018

- Recognised in Germany via Anabin, institution rated H+, 4-year programme equivalent to a German Bachelor's degree.

LANGUAGES

English: Professional working proficiency

German: A1 — in active study, targeting B1 in 2026
